IKER LATORRE

BACK-END | FULL-STACK DEVELOPER

Software developer with over 8 years of experience, specialized in PHP (Symfony, Laravel) and relational databases. Progressive evolution from support and QA to core development and leadership as a Scrum Master. I bring autonomy under pressure, critical thinking, product vision, and a strong capability to audit complex code. Patient, disciplined, and accustomed to unifying criteria across heterogeneous teams.

Computer Engineering
Universitat Oberta de Catalunya [2019 - Present]

Technician in Multiplatform Application Development
Institut El Calamot, Gavà [2018-2019]

Technician in Microcomputer Systems and Networks
Institut El Calamot, Gavà [2017-2018]

EXPERIENCE

Clickedu [2018-2026] | Barcelona

- **Back-End Developer & Scrum Master** [2024-2026]:
  - Maintenance and development of the core system (official documents and regulatory calculations, among others) and technical product definition. As Scrum Master, I managed the Compliance team, unifying criteria and ensuring agile deliveries.
- **Back-End Developer** [2021-2024]:
  - Development of new features and bug fixing, specializing in the accounting module and critical official documentation (records, bulletins).
- **Quality Assurance (QA)** & **Support Technician** [2019-2021]:
  - Auditing and validation of third-party code. Autonomous resolution of complex incidents under high pressure.
- **DUAL Intern Technician** [2018-2019]:
  - Support on incidents and assimilation of system architecture.

Escola Oficial d'Idiomes [2016-2017] | Viladecans

- **Microcomputer Systems and Networks Technician** (internship):
  - Equipment maintenance, local network management, and IT support.

Mugendo [2014-2016] | Castelldefels

- **Martial Arts Instructor:**
  - Group management and teaching ranging from 3-year-olds to adults.
  - Fostered transversal skills such as discipline, patience, respect, and teamwork.

TECHNICAL SKILLS

- **Development:** PHP (Laravel, Symfony), JavaScript (jQuery), Python, notions of C++/C#. Familiar with React, Angular, and Java ecosystems.
- **Databases & Infrastructure:** MySQL, Amazon Web Services (AWS), Cloudflare, Docker.
- **Environments & Tools:** Linux, Windows, macOS, VS Code, Git, agile methodologies (Scrum).
- **Innovation & Homelab:** Virtual server management with Proxmox, advanced home automation with HomeAssistant, and Amazon Alexa Skill development. Practical understanding of AI tools applied to development.
